Native with Mac, Soundcraft driver with PC

OVERVIEW

The latest Notepad series mixers make it easy to get legendary Soundcraft sound for your music, podcasts, or videos. Notepad mixers combine professional-grade analog components, renowned HARMAN digital signal processing and a built-in USB audio interface to use with your favorite Mac or PC editing software. Plus, ducking, when enabled, automatically lowers the volume of USB input background music when audio is detected by the main source, allowing your voice and message to stand out. Whether you're a singer-songwriter or a small group of podcasters, Notepad mixers offer best-in-class features so you can bring a level of polish to your creative productions that's sure to impress.

KEY MESSAGES

PRISTINE AUDIO QUALITY. A SOUNDRAFT TRADITION.

For over 40 years, audio professionals have trusted Soundcraft mixing solutions for pristine sound quality and reliable performance. Notepad series mixers continue this tradition with professional-grade Soundcraft microphone preamps, reliable XLR and 1/4" connectors, and durable metal enclosures built to stand the test of time.

SURPRISINGLY FAMILIAR. INCREDIBLY POWERFUL.

You'll find yourself right at home with Notepad's traditional channel strip layout. Aux sends and three EQ controls per channel give you a level of convenience often reserved for larger consoles. A rotary headphone volume control makes it easy to adjust your personal listening level, while a master fader with LED metering provides precise control over your master output signal. Ducking makes sure your audience hears you loud and clear by automatically lowering USB input background music when you speak. Designed for singer-songwriters and podcasters, the Notepad series provides a layout that's familiar to audio professionals yet easy to learn for beginners.

TWO ASSIGNABLE USB INPUTS

Using the Soundcraft USB Audio Control Panel, users can assign patching from their choice of mic inputs, the line inputs, or the master mix to computer.

ICONIC LEXICON DIGITAL EFFECTS

The Notepad-8FX features studio-quality effects by Lexicon. Enhance your projects with reverb, chorus, or delay with tap tempo control, backed by industry-leading signal processing technology built into the Notepad's DSP engine.

WORK SEAMLESSLY WITH YOUR MAC OR PC

Record, edit, and play projects using your favorite audio software thanks to Notepad's integrated USB audio interface. By combining Soundcraft legendary audio performance with HARMAN signal processing and a USB interface for your computer, Notepad offers the best of both analog and digital audio in a no-compromise solution.
